

T-Shirt - Front Print

Portrait / 280x400mm

How to set and supply your artwork correctly

1. Select: **Layers Tool**:  (F7) > Select: **Artwork (place here)** layer.
Create/Add your design to the **Artwork** layer.
2. Once your design is complete, please remove the **Guide** layer.
Failure to remove will result in the guide layer printing over your artwork design.
3. Export to: **Adobe PDF (Print)** (PC: ctrl+ E / Mac: cmd+E).
Please ensure when exporting to a PDF file you select 'pages'.

For more detailed information: Please download our Product Guide from our product page.

- **Accepted format:** Adobe PDF (Print). Ideally: PDF/X-4a: 2001 (one file)
- **Colour:** CMYK (RGB and Pantones will be converted)
- **Fonts:** Embedded or converted to outlines
- **Image Resolution:** 300dpi to 450dpi

 **Finished Size** - This is the size of your printed area.

 **Safe Area** - We recommend keeping text and important content out of the grey area.

 **Bleed** - Please extend your artwork into this section. This is to avoid white or unprinted edges when trimmed to finished size.

Please note: Any areas set to 'White' will print. If you require transparent areas (e.g. so that the t-shirt material shows through) please ensure these are set to 'no fill'.

If you are supplying a front and a back design, please ensure your front design is page 1 and your back design is page 2 of your PDF.

We position the print area approximately 50mm from the neck line. Please use the 'Tshirt positioning guide' layer to place your design within the print area.

T-Shirt - Back Print

Portrait / 280x400mm

How to set and supply your artwork correctly

1. Select: **Layers Tool** (F7) > Select: **Artwork (place here)** layer.
Create/Add your design to the **Artwork** layer.
