# ROLLER BANNER SIZES
HINTS & TIPS FOR THE BEST RESULTS

Roller banners are available in the multiple widths shown below and are all 2000mm in height. Please ensure you order the appropriate size for it's intended use to get the best out of the product. We recommend the wider banners for gaming backdrop usage.

800mm   850mm   1000mm   1200mm   1500mm

Non-Print Areas

The visible graphic area of our roller banners are 2 meters in height, however we ask for artwork to include a little extra at the bottom for fixing the material to the base stand.

This added space is included in our downloadable templates and highlighted by the shaded non print area.

Please take into consideration placement of artwork when designing to ensure important text and information (e.g. phone number and web address) are kept within the safe area and well away from the non print area. This is to ensure all text will be visible and not hidden inside the base stand, once raised for display.
